

# DIGITAL v2 PRESENTATION SET OPERATING INSTRUCTIONS

### STEP 1

IC - Do not look have the local speaker me turned up to maximum whe connecting a battery

#### FIT BATTERY – Do NOT use rechargeable batteries.

Use a good quality 9 volt battery such as a Duracell PP3. REMOVE the two screws using the tool provided and remove battery door.

**LOW BATTERY CHECK** – The battery is tested at switch ON and after each activation, if it is found to be low the Txi-D v2 gives a distinctive double tone warning. Replace the battery as soon as possible.

### Replacing a battery does not affect memorised

**Note** – Low battery warnings are also transmitted to the Rx-D v2. This is indicated by the LED flashing on the Rx-D v2 to indicate the Txi-D v2 that has the low battery.

AUTO SWITCH OFF – When switched ON if no acti is detected within approximately 60 hours the Txi-D v2 will switch OFF with an audible confirmation countdown warning. Press any **PB** to extend for another 60 hours

**PB FAILSAFE ABORT** – If **PBs** become held down continuously by accident the Txi-D v2 will assume a fault state and switch OFF automatically.

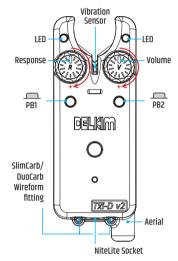

RESET TO FACTORY DEFAULTS – Turn ON holding down PB1 and PB2. Continue to hold both PBs as the Txi-D v2 cycles through the MENUS until the LEDs give a multi coloured flash, release the PBs and the alarm will turn OFF. This restores all the settings to Factory Defaults.

# **IMPORTANT**

An orgical Presentation Sets come with the alarms already paired to the receiver. If you have bought a single alarm to add to your set, see Rx-D v2 User Guide Section 2.0 for pairing instructions.

#### CONTROLS AND ATTACHMENTS

#### VIBRATION SENSOR.

PUSH BUTTONS - PB1 / PB2 (left / right) Button presses are acknowledged by various confirmation tones and LED flashes.

RESPONSE CONTROL (R) – Turn clockwise to increase the RESPONSE (sensitivity) of the vibration sensor to

VOLUME CONTROL (V) – Turn clockwise to increase level.

NITELITE SOCKET – Allows attachment of Delkim MITELITE SOURE! – Allows attachment of Definition illuminated visual indicators. Use included numbered bungs to protect when not in use. May also be placed in bottom of aerial tube.

SLIMCARB/DUOCARB WIREFORM FITTING – Two small holes at the base of the Txi-D v2 allows the attachment of the wireform that is used for hanger arms.

#### THE TXI-D V2 FEATURES:

- VIBRATION RESPONSE Controls the ability of the alarm to sense line movement and vibrations
- BEEP SPEED Helps maintain the best speed relationship as you adjust the RESPONSE
- MUTE Mutes Txi-D v2 speaker. • MULTI COLOURED LEDS – Can be set to
- · 8 LED BRIGHTNESS LEVELS.
- DAY/NIGHT MODE Allows LED brightness to be set for either mode.
- NIGHT MARKING LEDs glow at low level constantly in Night Mode
- 32 TONES.
- STEALTH MODE Deactivates Txi-D v2 LEDs when you get an activation.
- ADVANCED ANTI-THEFT SECURITY Sends alert to your RX-D v2 when alarm is turned OFF or is moved.
- **LOW BATTERY CHECK** The battery condition is tested, if it is found to be low it gives a warning.

### MAIN MENU SETTINGS

 $\textbf{SWITCHING ON/OFF} - \textbf{Hold down PB1} \ \textbf{and PB2} \ \textbf{until confirmation tones} \ \textbf{are heard and immediately release}.$ 

1.0 MUTE ON/OFF - MUTES Txi-D v2 speaker only.

• Press and Release **PB1** to activate.

MUTE continues for 5 minutes and left hand LED will flash. Press and Release PB1 to cancel. Note - when MUTE is ON all PB2 actions are disabled

### RESPONSE AND BEEP SPEED

- 2.0 RESPONSE CONTROL (R) The RESPONSE setting controls the ability of the alarm to sense line moveme before a beep occurs. nts, as RESPONSE is increased, less moveme
  - Turn clockwise to increase RESPONSE.

IMPORTANT – Line doesn't always need to move to get a beep, it can also vibrate and

- 2.1 BEEP SPEED CONTROL BEEP SPEED helps maintain the best speed relationship as you adjust the RESPONSE control (R) up or down. There are 5 levels of BEEP SPEED, Level 1 is the slowest and level 5 is the fastest. The default is level 3 and this should give you good all round performance for most situations but you may want to adjust it based on the conditions and fishing style.
  - Press and Hold **PB1** to cycle through the BEEP SPEED levels
  - Release **PB1** at required BEEP SPEED.

Adjust always starts at Level 1 and to reset simply repeat the process. Last setting

#### 3 (Default) Slowest BEEP SPEED Fastest BEEP SPEED\*

\*BEEP SPEED 5 – Should only be used for extreme situations where very low levels of RESPONSE are required and a far higher level of BEEP SPEED is needed to get enough indication.

• To activate Press and Hold **PB1** to cycle through the first 4 BEEP SPEEDS then continue to hold for 2-3 seconds until confirmation signal is heard and LEDs will flash a rainbow effect.

Do not adjust BEEP SPEED until you have adjusted the RESPONSE (R) to the desired level.

BEEP SPEED does not change the responsiveness of the alarm

For a full explanation of setting BEEP SPEED and RESPONSE visit - www.delkim.co.uk/adjusting-response-beep-speed

#### LED MODES/ADJUST

- 3.0 DAY/NIGHT LED MODE Select DAY (default level 8) or NIGHT (default level 4) LED brightness. NIGHT Mode always has Night Marking where LEDs will glow at a low level continuously.
- · Press and Release PB2 to toggle between DAY/NIGHT Mode. Last setting memorised. 4.0 LED BRIGHTNESS ADJUST – LED brightness can be set for DAY or NIGHT Mode First select DAY/NIGHT Mode (see above).
- Press and Hold PB2 to cycle through the 8 brightness levels (Level 1 = lowest, Level 8 = brightest).
- Release PB2 at required brightness

Adjust always starts at Level 1 and when Level 8 is reached it is confirmed by continual repetition of the info tone. Last setting memorised.

#### MENU 2 - TONE / LED COLOUR

To access MENU 2 turn Txi-D v2 ON and continue to hold both PBs until you get 2 beeps and LEDs flash all 6 colours. MENU 2 will automatically time out after 16 seconds or 8 secs from the last PB press and settings will be MEMORISED. 5.0 TONE ADJUST.

- Press and Hold **PB1** to cycle through the 32 TONEs.
- Release and Press and Hold **PB1** again to reverse direction of TONE.
- Release PB1 when required TONE is reached.
- To repeat a TONE during adjust mode Press and Release PB1.
- 6.0 LED COLOUR MODE User can select COLOUR •• • (Default COLOUR •).
  - Press and Hold **PB2** to cycle through the 6 COLOURS.
  - · Release PB2 when required COLOUR is reached.

#### MENU 3 - STEALTH MODE/ANTI-THEFT SECURITY

To access MENU 3 Turn Txi-D v2 ON and continue to hold both PBs until you get 3 beens and LEDs flash . MENU 3 will automatically time out after 16 seconds or 8 secs from the last **PB** press and settings will be MEMORISED.

- 7.0 STEALTH LED MODE Deactivates Txi-D v2 LEDs when you get an activation but keeps Night Marking active. NIGHT LED MODE only (Default OFF).
  - Press **PB1** to toggle STEALTH MODE ON/OFF.

For Delkim illuminated visual indicator users the NiteLite Socket is still active rol betwith intiminated visual minitation users the whether societies such a standard and lights up as normal if indicators are plugged in. Brightness can be adjusted as normal (see section 4.0).

- 8.0 ANTI-THEFT SECURITY ALARM Every time the Txi-D v2 is turned OFF it will always send a signal to the Rx-D v2 and trigger the Security Alarm that will sound continuously for 20 seconds. To disable turn OFF security on the Rx-D v2 (see section 3.2 RX-D v2 instructions).
- 8.1 ATMD (ANTI-THEFT MOVEMENT DETECTION) This gives an additional level of security when needed where **physically moving** the Txi-D v2 will also transmit an alert to the Rx-D v2 and trigger the Security Alarm that will sound continuously for 20 seconds (Default OFF).
  - · Press PB2 to toggle ATMD ON/OFF
  - Once set the system takes approx 30 seconds to activate.

#### **CARE GUIDELINES**

The Txi-D v2 and Rx-D v2 do not need servicing. Here are some general guidelines to prolong the life of our products:

- · After use in rain clean and store upright in a warm place to dry with the hard cases
- If a Txi-D v2 or Rx-D v2 becomes immersed in water, switch OFF, remove the battery and shake out any water. Store upright in a warm place to totally dry out.
- Clean PBs and Controls regularly with a toothbrush to stop dirt build up and
- Tampering with any screws other than to remove the battery door or treating with any substance **particularly WD40** will invalidate any warranty.

FIT RATTERY - DO NOT use rechargeable batteries. Use a good quality 9 volt battery such as a Duracell PP3. REMOVE the two screws using the tool provided and remove battery door.

LOW BATTERY CHECK - The battery condition is tested at switch ON and after each activation, if it is found to be low it gives a distinctive triple tone warning. Replace the battery as soon as possible.

BATTERY LEVEL MONITOR - The LEDs will light to show the level of the battery. 4 LEDs = maximum, 1 LED = low Press and Hold **PR1** and **PR3** to check hattery level

To maximise battery life keep the Rx-D v2 at least half a metre way from all electrical devices including battery packs. Replacing a battery does not affect memorised settings or pairing.

AUTO SWITCH OFF – When switched ON if no activity is detected from a paired Txi-D v2 within approximately 60 hours the Rx-D v2 will switch OFF with an audible confirmation countdown warning. Press any **PB** to extend for another 60 hours.

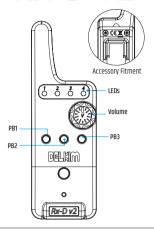

PB FAILSAFE ABORT – If PBs become held dov continuously by accident the Rx-D v2 will assume a fault state and switch OFF automatically.

#### **IMPORTANT**

existing Txi-D v2s th

# Rx-D v2

#### **CUNTRUIS**

PUSH BUTTONS - PB1. PB2 and PB3 (left to right). Button presses are acknowledged by variou confirmation tones and LED flashes.

VOLUME CONTROL (V) – Turn clockwise to increase level. ACCESSORY FITMENT – Fitting for Lanyard, Bankstick

#### THE RX-D V2 FEATURES:

- AUTO SYNC MULTI COLOURED LEDS Automatically
- EASY PAIRING Comes paired to your Txi-D v2 alarms and can pair with up to 12 alarms in total.
- BIVVY LIGHT MODE All LEDs illuminate WHITE to provide emergency illumination when triggered by the Txi-N v2
- NUICK TORCH Can light all LEDs to give emergency torch option
- DND (Do Not Disturb) Prevents the Rx-D v2 from being triggered by the Txi-D v2 from heavy showers or hailstones.
- RECALL Last channel activated by a Txi-D v2 will
- VIRRO Will vibrate when activation from Txi-D v2 is received and can be adjusted.
- ANTI-THEFT SECURITY ALARM Security Alarm will sound when triggered by the Txi-D v2
- LOW BATTERY CHECK The battery condition is tested,

## if it is found to be low it gives a warning.

MENU 3 - ANTI THEFT AND VIRRO SETTINGS

To access MENU 3 Turn Rx-D v2 ON and continue to hold all PBs until you get 3 beeps and LEDs flash . MENU 3 will automatically time out after 16 seconds or 8 seconds from the last PB press and settings will be MEMORISED.

- 6.0 VIBRO Rx-D v2 will vibrate when activation from a Txi-D v2 is received (Default ON).
- Press and Release PB1 to toggle ON/OFF.
- **6.1 CONFIGURE VIBRO REPEATS** The number of repeats may be changed from 1, 2 or 3 as required.
  - · Press and Release PB1 to switch VIBRO OFF
  - Press and Hold **PB1** to change number of repeats to 1, 2 or 3 releasing at required setting.

LEDs will light up to indicate the level.

#### 6.2 ANTI-THEFT SECURITY ALARM

When triggered by the Txi-D v2 switch OFF or ATMD (ANTI-THEFT MOVEMENT DETECTION see section 8.1 Txi-D v2 instructions) the Security Alarm will sound continuously for 20 seconds (Default ON).

· Press and Release PB3 to toggle between ON/OFF.

Note – Turning SECURITY OFF is memorised. Please make sure you are not fishing in an area that needs security before disabling this feature.

If ANTI-THEFT alarm has been triggered press any PB to abort.

Note – To avoid accidental triggering always switch Rx-D v2 OFF before Txi-D v2s.

#### MAIN MENII SETTINGS

SWITCHING ON/OFF – Hold down PB1, PB2 and PB3 until confirmation tones are heard and immediately release.

- 1.0 BIVVY LIGHT MODE All LEDs illuminate together in WHITE to provide illumination for 20 seconds when triggered by a continuous activation from the Txi-D v2 of at least 4 seconds.
  - Press **PB1** to toggle between ON/OFF. (Pressing any PB whilst the LEDs are illuminated turns them OFF until BIVVY LIGHT is triggered again).

Note - Use of BIVVY LIGHT will reduce battery life. BIVVY LIGHT MODE + DND may be used at the same time

- **2.0 DND (DO NOT DISTURB)** An emergency setting that prevents the Rx-D v2 from sounding until 4 seconds of continuous activations have been received. Stops unwanted indications from a sudden change in conditions such as a heavy rain or hailstones, times out automatically after 15 minutes.
  - · Press PB2 to toggle ON/OFF
- 2.1 DND LOCK Locks DND ON continually and can be used to deliberately stop the user from being disturbed by anything other than a full blooded run.
  - Press and Hold PB2 until the locked pip is heard.

Use with great care and NOT when fishing near snags.

- 3.0 RECALL Last channel activated will illuminate 4.0 QUICK TORCH – All LEDs illuminate together in WHITE
  - to provide emergency illumination manually for a maximum of 20 seconds. Press and continue to Hold PB3.

Over use of OUICK TORCH will significantly reduce

#### MENU 2 - PAIRING AND MEMORY **CLEAR SETTINGS**

To access MENU 2 Turn Rx-D v2 ON and continue to hold all PBs until you get 2 beeps and all Channel LEDS flash

The Rx-D v2 will switch OFF automatically after 45 seconds with nothing paired if pairing is not confirmed. If an error is made before Pairing Completion switch OFF manually or wait for automatic switch OFF

- 5.0 PAIRING MODE Allows Txi-D v2 to be paired. Additional alarms can be added too without the need to clear the memory.
- Press **PB1** to enter pairing mode Rx-D v2 will skip over any paired channels and flashes the first available channel.

Note - You can not pair to a channel that has already been used. To use a channel that has already been paired you must do a MEMCLEAR see section 2.1 below

- · Activate the Txi-D v2 and when it is paired correctly the Rx-D v2 LEDs will flash with a confirmation tone, next available channel will start flashing. You can select a different channel at any time pressing **PB1**.
- There are 12 channels in total (3 x 4 Channels) Channel 1-4 flash 🌞 , 5-8 flash 🌞 and 9-12 flash 🐞 while in PAIRING MODE.
- Once you have finished press PB2 to confirm pairing Note – Rx.D v2 will automatically pick up the set colour of the Txi-D v2 once pairing is complete and will only allow pairing with one unique Txi-D v2 code at a time. Any further transmissions of the same code will result in an error tone
- **5.1 MEMCLEAR** Clears pairing memory. This must be carried out in order to pair to a channel previously used or to correct any pairing errors. This clears the memory completely, to pair again see above.
  - Press and hold PB3 until the Rx-D v2 switches OFF
